

## **Skilled Nursing Care: A Team Approach to Recovery**

“I’ve had such a good experience during my stay at RHSHC as a skilled care patient. I want to tell everyone that the care I received has been superb.”

Phyllis Stevenson

“I am recovering from total right knee replacement surgery and need physical therapy to regain my mobility. Everyone here has been kind beyond description and has gone the extra mile to ease my discomfort. My room is comfortable and the food is very good. The personal attention I have received from my health care providers, Dr. Tanya Vreeke and Nurse Practitioner, Annette Johnson, as well as the therapists, nurses, activity coordinator, social worker, dietitian and dietary staff, has made it possible for me to re-gain my strength and mobility enough to return to my home.

Thank you to RHSHC for making this possible and for exceeding all of my expectations.”

*- Comments from patient Phyllis Stevenson from Lime Springs, Iowa*

**For the best of care close to home, you have a choice on where you recover after having hip or knee replacement surgery.**
